Skills

- Back-end: PHP, Python, Flask, SQL databases such as MySQL, SQLite, MSSQL
- Front-end: HTML, CSS, Javascript, jQuery, Vue Js, React Js
- Preprocessors and Tools: Pug, Sass, Webpack, Gulp, Git, Pip, NPM
- Be able to learn new technologies quickly
- Learning Style: I prefer learning things by doing right away and reading books to watching

Experience

STUDIO AMK
Aug 2016 - Oct 2016
studioamk.com

Junior Developer (OJT)

- I did two projects - ShanKoemee website (shankoemee.com) and a karaoke android app. The android app was implemented by using android studio(Java) and C++ sound engine. I didn't do the whole process, just echo feat for that app.

JARPLAY TECHNOLOGY
Jan 2018 - Jul 2019
jarplaytech.com

Front-End Developer

- Specialized in Vue js framework in software development
- The projects I mainly took part in were Currency Exchange Software Development and E-Commerce Software Development, which already included Inventory Management
- I also joined partially in the projects such as Delivery Service System like food delivery, Working-Space Rental System, Website CMS System and Medical Sale Incentive System
- Developed Static Websites using Jekyll

SELF-EMPLOYED
Aug 2019 - Jan 2020

Freelance Front-End Developer

- Developed Payment Record System using React Js, which was for keeping digital payment transaction records(the main payment method was "Alipay"). That project was implemented by me and my friend, who was responsible for the backend development.

Education

2012 - 2014
(UNFINISHED)

Monywa Computer University - Computer Science

- Dropped out after 2 years later.

2014 - 2017
(HND DIPLOMA)
imu.edu.mm

Info Myanmar College - Computing

- Did two projects - Online Attendance System and Fashion Online Shopping where the former is a group project and I was responsible for backend with PHP and the latter is a solo project for web development subject with PHP
- Hosted source code of these projects on my [GitHub](https://github.com)

OCT 2019 - JUN 2020

(B.SC DEGREE)

napier.ac.uk

Edinburgh Napier University - Computing

- Learned Python and Flask Framework and did two projects using them in the related subjects - Advanced Web Technologies and Group Project.
- Learned Linux thoroughly using <http://linuxzoo.net/> in Network Service Subject.
- Learned also basic Bash Scripting in Computer Systems Subject
- In a group project, I was a project manager and lead developer of a 4-group team. I learned [P3.express](#) being an agile project management framework. Given the project timeline, I managed to complete the project in due date.

Interests and Hobbies

- Love reading books such as Religion, spirituality, and Philosophy
- If I get bored, I usually watch netflix
- Sometimes, I love to write posts on [Medium](#)
